

ALBERT CAMPOS

San Antonio, TX 78249 | 210.577.2051 | acampos892@gmail.com | linkedin.com/in/albert-campos | github.com/abert465

PROFESSIONAL SUMMARY

Full-stack .NET developer with 6+ years building web applications and business systems for finance, legal tech, and municipal government. Ship end to end on C#, .NET 8/10, ASP.NET Core, and SQL Server, with React, Vue, and Blazor on the front end. Track record of replacing manual process with automation — legal case workflows, deployment pipelines, and operational reporting — while keeping the legacy systems they replace running in production.

TECHNICAL EXPERTISE

Backend & Languages: C#, .NET 6–10, ASP.NET Core, Blazor, Razor Pages, Entity Framework Core, Dapper, LINQ, VB.NET, T-SQL, PowerShell

Frontend: React, Vue, TypeScript, JavaScript, HTML5, CSS3, Bootstrap

Cloud & DevOps: Azure (App Services, Pipelines, Azure SQL, Functions, AKS), AWS (EC2, IIS), Docker, CI/CD, Infrastructure as Code

APIs & Architecture: REST APIs, Microservices, Swagger/OpenAPI, System Integration

Databases & Reporting: SQL Server, Stored Procedures, SSIS, SSRS, Query Performance Tuning

Platforms & Tools: Salesforce (Apex, Visualforce, SOQL/SOSL, Flow), Git, Azure DevOps, JIRA, Visual Studio, Power Automate

Practices: Agile/Scrum, SDLC, TDD, Unit Testing, Code Review

PROFESSIONAL EXPERIENCE

Software Developer | Extra Duty Solutions / Jivasoft | San Antonio, TX

September 2025 – Present

- Build full-stack overtime and scheduling features in .NET 8, C#, Blazor, and SQL Server for police department workforce management, including the Boston Police Department deployment.
- Write the T-SQL stored procedures behind reporting, filtered search, and CRUD operations across the platform.
- Implement configuration-driven role-based access control so new municipal clients onboard without code changes.
- Maintain and extend legacy VB.NET/ASP.NET applications alongside the new platform, shipping fixes and client-requested enhancements.

Software Developer | Easy Expunctions | San Antonio, TX

July 2022 – February 2025

- Led end-to-end development of a legal automation platform on .NET 8, Entity Framework, and React/Vue, serving thousands of users through court expunction workflows.
- Delivered 15+ features with legal subject-matter experts, automating review steps that previously ran by hand and cutting manual case processing roughly 30%.
- Refactored legacy T-SQL and indexing strategy, cutting database latency about 40% and clearing the timeout errors behind the platform's most frequent support tickets.
- Rebuilt release on Azure DevOps pipelines, moving deploys from a scheduled manual event to a zero-downtime push, and set the code review and SDLC practice the team ran on.
- Built Salesforce solutions in Apex and Visualforce with SOQL/SOSL data access, plus Flow automation and integrations through Salesforce APIs, Power Automate, and Azure Functions.

Software Developer | IBC Bank | San Antonio, TX

December 2019 – July 2022

- Owned full lifecycle development of internal banking tools in C# and ASP.NET used by 500+ employees across daily operations.
- Built SQL Server stored procedures and SSIS ETL pipelines feeding reporting over large transactional datasets.
- Developed SSRS reports giving leadership direct visibility into operational banking metrics.
- Standardized Git branching and code review across the development team, cutting merge conflicts roughly 30%.

Tier 3 Technical Support Analyst | Inspired eLearning | San Antonio, TX

April 2017 – December 2019 • Promoted from Technical Support Analyst, August 2018

- Resolved escalated Learning Management System cases at 98% SLA adherence for enterprise clients.
- Shipped HTML5, CSS, and JavaScript front-end fixes that removed a recurring class of UI support tickets at the source.
- Integrated SAML and LDAP single sign-on for 20+ enterprise clients and owned their technical configuration through go-live.

Operations Sr. Specialist | Chase Bank | San Antonio, TX

July 2013 – January 2017 • Started as Technology Operations Intern

- Audited daily operational workflows and implemented process improvements that raised team productivity about 15%; resolved 1,000+ Tier 1 VOIP, VDI, and desktop cases as an intern before moving into the specialist role.

SELECTED PROJECTS

- **Automated Expunction Engine** — .NET microservice applying legal rule validation to expunction filings; lifted throughput past 500 cases per month.
- **AI Legal Assistant Bot** — Azure Bot Service chatbot handling routine client FAQs, returning 15–20 hours per week to legal staff.
- **Enterprise Cloud Migration** — Moved IIS-hosted applications from AWS EC2 to Azure App Services, cutting hosting spend 20%.
- **Developer Portfolio Platform** — .NET 10 API with EF Core and SQLite behind a React SPA served same-origin; containerized with Docker for single-container deployment. github.com/abert465

EDUCATION & CERTIFICATIONS

B.S. Software Engineering: Western Governors University — in progress, expected 2027

Certifications: ITIL® Foundation (expires November 2026) • Argo Browser-Based Developer (2021) • Software Development Bootcamp, Austin Coding Academy (2016)
